The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 2 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 2, it is unclear if the panes of different sizes and/or shapes are the same as or different from the panes found in claim 1.

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the catch projection and actuatable slider (claim 5) and step (claim 8), must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

The disclosure is objected to because of the following informalities: "heated upper plate 2" (page 3, line 7) or "top base plate 2" (page 4, line 9); "holding angles 18" (paragraph 16, line 9) or "insert parts 18" (paragraph 17, line 2); "shaping ring 3" (paragraph 9, line 4) or "shaping area 3" (paragraph 18, line 3).

Appropriate correction is required.

Claims 1-12 are allowed. The claims fail to disclose or suggest top and bottom shaping means being interchangeable to enable matching of the peripheral foaming device to panes of at least one of different shapes and sizes.

The request for correction of inventorship adding Hans Jurgen Brandner and Cord Hermann Hagenmeyer as inventors in this application has been granted.
